Request for Change  
Change Request #:10-22**

Requestor Name:	John W Wald	Date:	9/20/10	Affiliation:	
Email Address:	John.wald@pnl.gov	Phone No:	509-371-7906	DOE	
				Contractor	X
Proposed Change:	<p>Change the "Primary Unit of Measure" for OSF Use Code 6919 – Street Lights, from Linear Feet to Each.</p> <p>Background – Current FIMS User Guide establishes DOE's desire to track street lighting under the "Service Structures – Not Buildings" use code section 6000 (Section C, page C-15), and has identified a specific use code to accomplish this end objective in FIMS (e.g. 6919; page C-17) as an OSF real property asset.</p>				
Justification:	<p>There is no explanation in the FIMS User Guide how/why a unit of measure in linear feet is intended to capture the desired quantification for street lighting, nor how this would be applied to actual field conditions. Furthermore, street lights are typically and most easily captured in units of measure "each".</p> <p>This gap could be corrected either through a more detailed explanation of how a linear foot unit of measure is intended to be applied to quantify street lights, or a change to "each" for the unit of measure.</p>				
<b>Please Do Not Type Below This Line</b>					
Remarks by FAC:	<p><b>FAC Recommended 10/20/10</b> – Assets with OSF Usage Code 6919 – Street Lights are currently reported to the Federal Real Property Profile (FRPP) with a unit of measure of each. This change will not impact the FRPP reporting.</p> <p><b>08/31/2011 – FDDC Approved</b></p> <p><b>Implemented with FIMS v2.3 on January 18, 2012</b></p>
